DETAILED ACTION

Response to Election/Restrictions

1. Applicant has stated that they elect the species of claim 10. However, claim 10 recites a sub-genus. Applicant's reply is non-responsive because Applicant has not elected a single species of a *single* combination of a *single* host material *compound* and a *single* dopant material *compound*. Applicant MUST 1) elect one host species, 2) elect one dopant species, 3) include an identification of all claims readable on the elected host and dopant species, 4) affirm that the elected host and dopant satisfy the temperature relationship of claim 1. The requirement for the election of species is clarified below.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention: particular combinations of host and dopant materials, such as those disclosed on pp. 13-15. Accordingly, Applicant is required to choose a single disclosed particular combination of host and dopant, which satisfies the temperature relationship of claim 1, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 29-31 are generic as to this issue.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
